

Edgerton Fire Protection District

Skill Drill #115 - Chimney Fires

Objective

Participants shall become familiar with equipment used at chimney fires and the techniques used to safely bring them under control.

Drill

Introduction

Participants will be shown a brief slide show and review the equipment that will be used during the training. The residential fire SOG will also be reviewed.

Evolution #1

Participants will proceed to Racetrack Park and position at the pavilion near the deer pen. Each participant will work in teams to properly extinguish the chimney fire without using water. Assignments shall be made according to the residential fire SOG.

Cleanup

Fill all bottles, clean facepieces, place all equipment back in service.

Participants will meet in the meeting room to discuss what they learned.

Evaluator Talking Points:

- Ensure that a hoseline is pulled to the roof.
- Use water as a last resort. Why?
- Review all equipment used for chimney fires.
